1. THE STORY

MEET xBILLIE

xBillie is a young boy who grew up in the sub-urbs, living his whole life in poverty. His strict parents keep urging him to complete school in the hopes of him becoming a successful lawyer one day to help the family out of their everlasting debt.

For xBillie, the idea of going to school for the majority of his childhood has never been a settling thought.

He can't seem to shake this gut feeling that there is something bigger waiting for him. Call it a higher purpose in life, or something that can affect society in a much greater way than just having an office job.

Having a different way of thinking always got him into trouble with establishing connections with other kids his age, resulting in him constantly getting bullied at school.

Despite the difficult and trying times that life threw at him, there was always one thing that got him through it; his passion for video games.

xBillie is determined to prove his parents wrong on the idea that finishing school and working for a boss is the only way to achieve financial freedom and success.

This is where his journey of self-mastery begins.

Join xBillie on his journey to reach generational wealth and to become the first billionaire in his family.

I am Billie, You are Billie, We are Billie.

2. WHAT ARE NFTS

A non-fungible token is a unique and non-interchangeable unit of data that is generally encoded with the same underlying software as many cryptos. It represents real-world objects like art, music, in-game

items and videos. The unique identifying codes of an NFT creates digital scarcity and gives the holder a verified and public proof of ownership which becomes more valuable as we enter the age of metaverses.

3. WHY ARE WE CHOOSING THE XRPL?

The XRPL is set to support NFTs and smart contract features through federated side-chain integration and we couldn't be more excited. As a result of the exponential growth in the decentralized finance industry, Ripple is looking to fulfill the high demand of features requested by developers and contributors of the XRPL. This request includes the demand for smart contract capabilities. The XRPL delivers a unique

combination of low cost, high speed and good payments features which works excellent for NFT creation at scale. Unlike the Ethereum blockchain or the Binance Smart Chain, the XRPL has the ability to maintain very low transaction fees while also being scalable which benefits both the buyers and sellers of NFTs. We believe that the XRPL will play a prominent role in the growing NFT space.

4. OUR VISION

As a team we are diligently working towards becoming a prominent platform in the XRP NFT space. By focusing on originality and constant improvements to both our 2D and 3D assets, we strive to fully integrate our digital avatars within the upcoming metaverse. As hustlers with a gaming background, we have always dreamed of the opportunity to one day earn passive income

while playing video games. This has recently become a possible reality with the development of blockchain technology. As such, we are hiring game-developers to make an official Billieverse Play-to-Earn game, where you can earn cryptocurrencies while leveling up your character. More information coming soon. (Whitepaper V2.0)

5. ROADMAP

The current Billieverse roadmap.
Will get updated in Whitepaper V2.0

Q4 2021

8. FAQ

WHEN WILL THE PRE-SALE START OF THE XBILLIE COLLECTION?

- The Pre-sale of the first 500 xBillie tokens (10%) will start on Friday the 26th of November 10:00 PM CET. The sale will be divided into 3 pieces.
- Early birds: 200 Tokens at a set price of 150 XRP per token.
- Second wave: 150 tokens at a set price of 200 XRP per token.
- Third wave: 150 tokens at a set price of 300 XRP per token.

WILL THERE BE AN AIRDROP?

We will be airdropping 30% of the total supply (1500 xBillie tokens) to all participants who meet the following requirements:

- Must have set the xBillie trustline before 6 Dec-21
- Must hold atleast 0.016 xBillie tokens on 6 Dec-21

See FAQ on website for more details.

HOW DO I BUY XBILLIE NFTS?

- Install XUMM wallet on your Android or Apple device.
- Deposit XRP into your XUMM wallet (10 XRP for activation and 2 XRP to setup the trustline.
- [Add the xBillie trustline here](#)
- Connect your XUMM wallet on www.xrptoolkit.com and go to the trade section. Here you can buy your xBillie.

WHAT IS THE TOTAL SUPPLY OF THE XBILLIE TOKEN?

The Total Supply is 5000 Tokens. The account is blackholed so no more tokens can be issued.

HOW MANY NFTS WILL I RECEIVE WITH 1 XBILLIE TOKEN?

1 xBillie token will get you 1 xBillie NFT.

WILL THE NFTS BE RANDOMLY GENERATED AND DISTRIBUTED TO ALL TOKENHOLDERS?

Yes. All 5000 xBillie NFTs are unique and original. Each NFT comes with their own traits, characteristics and attributes. Some of them will be more rare than others (Look for hidden Easter Eggs!)

WHEN WILL THE NFTS BE MINTED?

Once the XLS-20d proposal is implemented on the XRP Ledger. This will support non-fungible tokens to be purchased, sold and traded on the XRP ecosystem. Once this becomes a working functionality, you will be able to mint your xBillie NFTs.

WILL THERE BE GIVEAWAYS?

The team has allocated 23% of the total supply (1150) for loyalty rewards, giveaways and contests that will be held on the Billieverse Twitter account and Discord server.

9. DISCLAIMER

The Billieverse White Paper is for informational purposes only. This document is a marketing document and not intended to be legally binding. Its purpose is limited to providing relevant information to determine the project's parameters and future objectives, and informing current and future Billieverse investors about the accompanying risks for users when spending money on blockchain technology and projects.

We, Billieverse, reserve the right to change or alter any information within this document. Potential investors of Billieverse regarding any project launched, must understand and acknowledge the risks associated with blockchain technology along with any crypto-related investments. We advise buyers to get a professional consultation before purchasing. Potential buyers should analyse risks before buying any token, including any project associated with Billieverse. Investing in any Billieverse project represents an understanding and willingness to accept the risks of spending money on blockchain technology. These risks include but are not limited to the following:

Policy Risk: constantly changing political and regulatory trends may lead to significant price volatility.

Transaction Risk: the behaviour of traders on the secondary market will always influence any project by Billieverse. The secondary market for tokens that utilise blockchain technology has significant volatility, which may drastically affect the value of your investment in Billieverse.

Technical Risk: blockchain technology is a rapidly developing technological field. This dynamic environment may lead to many unforeseen technological issues, challenges, but also disruptive trends, all of which may influence the value of the token.

Operational risk: all operations carry inherent risks on many factors, which may be caused by the illness of essential stakeholders, major strategic disagreements, breakdown of crucial equipment at critical moments, and so forth. Operational risk may always influence the success of the project or the underlying value of the tokens.

Potential Billieverse investors must realise this responsibility and conduct a rigorous and careful analysis. The introduction and description of the basic condition of the project in this document is an invitation to the general public. Its not a commitment nor a guarantee.
